---

Full Stack Software Engineer with 6+ years of professional experience delivering production-ready web applications using React, TypeScript, Node.js, and AWS. Experienced in designing scalable backend services, deploying cloud-native infrastructure, and owning features end-to-end in distributed systems environments. Strong focus on code quality, system design, and production reliability.

## EXPERIENCIA PROFESIONAL

---

### ZirconTech (Remote)

Full Stack Developer

Montevideo, Uruguay

2021 – Present

- Delivered end-to-end features using Next.js, React, NestJS, and TypeScript across multiple client projects.
- Designed and deployed scalable backend services on AWS (ECS, EC2, RDS, S3), including CI/CD pipelines and environment configuration.
- Built and maintained REST APIs with authentication, background job processing, and third-party integrations.
- Modeled and optimized relational and non-relational databases (PostgreSQL, MongoDB).
- Contributed to infrastructure setup and production monitoring for multi-environment deployments (UAT / Production).
- Participated in technical discussions, peer code reviews, and feature planning with distributed teams.

### iVoy

Frontend Developer

Mexico City, Mexico

2019 – 2021

- Developed production web interfaces using React and TypeScript.
- Integrated frontend applications with backend APIs and optimized UI performance.
- Collaborated in agile teams delivering continuous product improvements.

### Accenture México

Backend Developer

Mexico City, Mexico

2018

- Developed backend services using Java and Spring Framework.
- Participated in enterprise-level system integrations and service development.

## EDUCACIÓN

---

### Instituto Politécnico Nacional (IPN)

Bachelor's Degree in Mechatronics Engineering

Mexico City, Mexico

2011 - 2017

### Ironhack

Full Stack Web Development Program

Mexico City, Mexico

2019
